***Aurum Discovery Limited closes €1m private placement and welcomes new strategic investors to the group***

**Aurum Discovery Limited, a private project generator based in the Republic of Ireland, is pleased to announce the successful closure this week of a non-brokered private placement of €1,000,000 / CAD\$ 1,560,000.**

More than ninety per cent of the subscription funds come from **Roland Butler, Altius Minerals** and **John Tognetti**, the latter two joining Aurum's shareholder register for the first time.

The proceeds of this placement will be used to advance the company's existing copper and uranium exploration portfolio in Scandinavia, Ireland and The Czech Republic, alongside new generative work in both Europe and Africa.

Barry Stoffell, Aurum Discovery CEO, commented:

*"We are delighted to welcome Altius Minerals and John Tognetti as new shareholders, and greatly appreciate the continued support of Roland Butler, who as a non-executive Director has been an invaluable part of the Aurum Discovery team for several years now.*

*The presence on our register of such successful and well-respected advocates of the prospect generator model is a welcome endorsement of our business, and our ambition to grow into a significant European royalties company throughout the next decade."*
